SKILLS

- HTML5 / CSS3 / Tailwind
- JavaScript (ES6+) / TypeScript
- React.js / Vite
- Node.js / Express.js
- MongoDB / Mongoose
- Java Core / OOP
- JDBC / Java Swing
- MySQL / SQL Relational DB
- REST API Engineering
- Git / GitHub Version Control
- Responsive Web Architecture

LANGUAGES

- Amharic **Native**
- English **Proficient**
- Afaan Oromo **Proficient**

INTERESTS

- Full-Stack System Design
- Open Source Development
- Software Engineering Best Practices
- Problem Solving & Algorithms

PROFILE

I am a 3rd Year Software Engineering student at Adama Science and Technology University (ASTU), Ethiopia, focused on developing practical web applications, full-stack systems, and robust desktop software. Experienced across TypeScript, React, the MERN stack (MongoDB, Express, React, Node.js), Java, and MySQL. Disciplined in writing clean, structured code and actively seeking software engineering internships, junior developer roles, and freelance opportunities to contribute to high-impact products.

EDUCATION

B.Sc. in Software Engineering

2023 – Present (Expected Graduation 2027)

Adama Science and Technology University (ASTU), Adama, Ethiopia

Ethiopian University Entrance Certificate

2022

Ethiopia

ENGINEERING PROJECTS & EXPERIENCE

AdamaMaterials E-Commerce Platform

2025

TypeScript · React · State Management · E-Commerce

- Engineered a full-featured construction materials marketplace with strict TypeScript type definitions
- Implemented real-time product search, multi-category filtering, and interactive cart drawer calculations

MERN Todo Pro — Productivity Suite

2025

MongoDB · Express.js · React · Node.js · REST API

- Architected a full-stack sprint management system with RESTful Express API and MongoDB persistence
- Implemented CRUD operations, task priority tagging, sprint status columns, and reactive UI updates

ACE Meklit — Business Website

2024

Freelance Client Project · HTML5, CSS3, JavaScript

- Designed and built a mobile-first responsive commercial site for ACE Meklit with smooth navigation
- Optimized performance and deployed to Netlify with fast cross-browser loading times

Java Multi-Client Group Chat Application

2024

Academic & Personal Project · Java, TCP Sockets, Multithreading

- Built a real-time TCP socket server with dedicated thread handling for concurrent client communication
- Implemented message broadcasting, connection management, and Java Swing desktop interface

Student Registration System

2024

Academic Project · Java, JDBC, MySQL Database

- Engineered a Java Swing desktop CRUD system connected to MySQL relational database schema via JDBC

TECHNICAL PROFICIENCY SUMMARY

Languages & Frameworks: TypeScript, JavaScript (ES6+), React, Node.js, Express.js, Java Core/OOP, HTML5, CSS3/Tailwind

Databases & Storage: MongoDB, Mongoose, MySQL, SQL, JDBC, Relational Schema Architecture

Tools & Ecosystem: Git, GitHub, Vite, REST APIs, VS Code, IntelliJ IDEA, Tomcat, Netlify, Vercel
